(54) METHOD FOR PRODUCING BISPHENOL A

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a method for producing bisphenol A by condensation reaction between phenol and acetone in high conversion.

SOLUTION: This method for producing bisphenol A comprises the step of condensation reaction between phenol and acetone in the presence of a catalyst consisting of an acid-type ion exchange resin partially modified with a sulfurcontaining amine compound; wherein when the methanol content of the acetone is 400-7,000 wt.ppm, the ion exchange resin to be used is 15-50 mol% in modification rate, and a mercaptan compound is added to the reaction system.
